

'Combat Covid' tank for safe wash

TNN | Aug 3, 2020, 04:50 AM IST

Kolkata: Patton, one of the leaders in water tanks, is entering into 'combat Covid' product ranges. Patton has designed and developed the Contactless Safe Wash Station as a safety initiative. The product is hands-free and foot-operated.

"It is easy to operate and maintain, it is suitable for residential, commercial, industrial, medical, and public spaces," the company has said.

Preeyam Budhia (president – business development), Patton Group, pointed out that the 200-litre tank allows for up to 300 hand washes per refill, while the 500-litre tank allows for up to 750 hand washes per refill.

According to her, the company already got clients like Indian Army, Indian Navy, INS Netaji Subhas, the West Bengal State Agricultural Marketing Board, Royal Calcutta Golf Club (RCGC) for the ranges.

Upon being asked about the early stages of product development, Budhia said, "We are already living in a VUCA (Volatile, Uncertain, Complex, Ambiguous) world and COVID-19 has shaken up our very way of existing, locally and globally. It was the need of the hour to be prepared for a post-lockdown new normal. Handwashing is crucial to winning this battle and our focus was on creating a solution that could be easily adopted by multiple sectors and industries."
